QUICK START · FAMILIES

Speech practice with Chip, when it's convenient for you.

CrispSpeech™: your child says words to Chip, a friendly robot who listens and cheers. Your speech therapist listens to the recordings and sets the plan. No ads, no timers, no pressure.

Getting set up: 4 easy steps, ~10 minutes

1 Create an account.
Open the email from your speech therapist and tap **Set up your account**. Set your name and password and tap **Create my account**.

2 Add your child.
Tap **Next: add your child**. Enter their name and birthday. Create a username and password for your child's sign-in. Tap **Save and continue**.

3 Sign permission.
Read the permission form and tap **Sign and continue**.

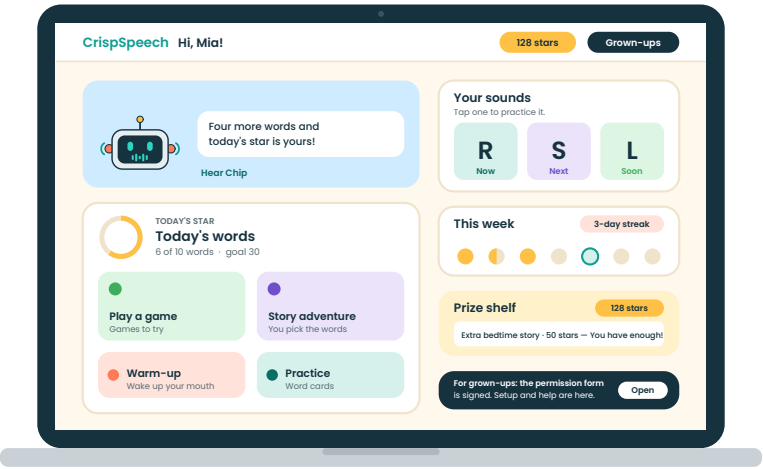

4 Launch.
Tap **Switch to your child** and launch your child into practice and fun.

Who does what

- **Your child** signs in with their own username, practices and collects stars. No scores, no verdicts, no timers.
- **Grown-ups** own the account and the permission form, set the prizes and the daily goal, and see **Progress**.
- **Your speech therapist** invites you, assesses the initial check-in, sets the treatment plan and reviews the recordings.

What you need

- **Use Safari or Chrome.** A tablet or computer is preferred but a phone is possible. On an iPhone or iPad, tap **Share**, then **Add to Home Screen** to bookmark.
- **A microphone.** The built-in one is fine; a quiet room helps. At the start, tap **Allow microphone**.

Your child's home on an iPad or a computer once the plan is in: Chip, Today's star and the games on the left; the sounds, the week and the prize shelf beside them.

The grown-ups' corner

Sign in with your own email and password, then tap `Grown-ups` on your child's home screen:

- **Switch to your child's account**: rename, change the birthday, reset the password or pictures.
- **Progress**: practice days, minutes, stars, the streak, and each sound target.
- **Stars and prizes**: the daily goal (words, minutes, check-ins), the prize shelf, and `Download` for everything CrispSpeech holds about your child.
- **Toolbox**: the R tongue trainer and your child's storybooks.
- **Help**, **My account**, **Settings**, **Sign out**.

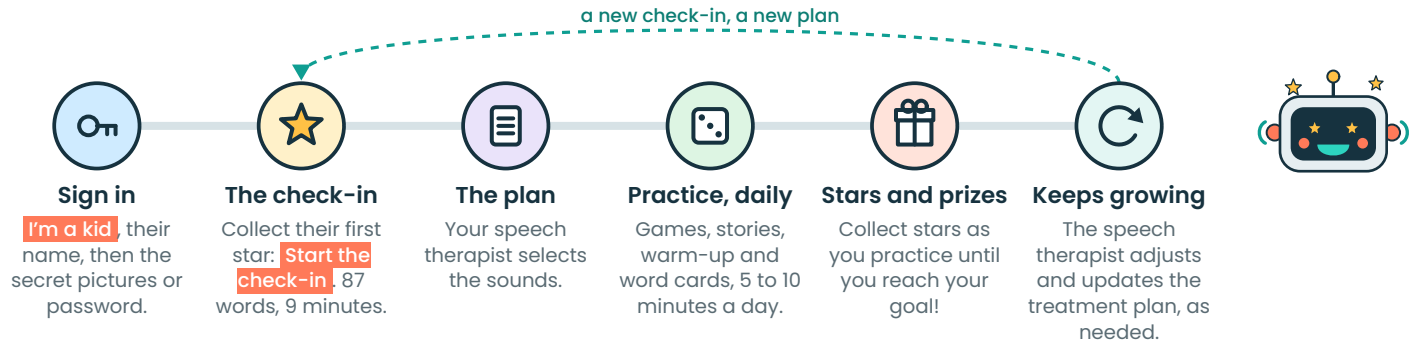

Stars and prizes

- **Each practice earns stars**, right or not. A day that reaches the goal is worth 100.
- **Prizes are customizable**: an extra bedtime story, a trip for ice cream. When the shelf says "You've reached your goal!", a grown-up taps Cash in.

Privacy, in brief. Nothing is recorded before a parent signs, and you can withdraw at any time. Recordings are stored encrypted in the United States, seen only by your child's speech therapist, the practice's staff and the CrispSpeech admin, and deleted 12 months after the last session. No advertising, no tracking, no selling of information. Questions or deletion requests: **privacy@crispspeech.com**.

Good to know. Chip's ear is good, not perfect, and so it is helpful that your speech therapist reviews your child's performance. Five wrong sign-in tries in a row earn Chip a short break.

Your child's journey

One word, start to finish

1 · Tap the mic
Its label says what to do: "Say rabbit!"

2 · Get ready… Go!
After the beep, say the word nice and clear.

3 · Chip listens
Recording stops by itself. For a sentence, tap "I'm done".

4 · "Nice!"
Continue for each word. The recap and the stars wait for the end.
